

## Jr.KG. Section June 2017

Display corner :

Different letters in English and Hindi , Numbers and concepts in Maths and different colours were introduced through display corners, where flash cards, real /toy objects related to the same are displayed. Children are given an opportunity to handle and explore the same.

Environment Day : Importance of environment conservation was explained to children and students were motivated to work towards it. As a mark of Environment Day Cotton dabbling was taken to make earth and was put up in classes .

**Bubble Print activity ( corn making) :** Bubble print on chart paper was done to make a corn in scrap book. This activity was conducted to enhance their creative skills and also to make them aware that corn is grown in Rainy season .

**Hindi Recitation Competition :**

Hindi Recitation Competition was held to boost the confidence of children and instill healthy competitive spirit in them.

:

**Sensory Play Activity :** To make children aware of the 5 Sense Organs and its functions an activity was conducted where different things like sugar,salt, bell, essence sticks, perfume, sand paper, cotton etc. were displayed. Children were encouraged to see, taste, smell ,feel and hear.

**Story Telling Activity :** Storytelling encourages and enhances the listening skills of children. It also enhances vocabulary skills. Storytelling activity was conducted where importance of healthy and unhealthy food and counting numbers were introduced in a playway method.

**Which is odd activity :** To develop the identification and logical thinking “Which is odd ?” activity was conducted for students. Children had to give a cross to the picture which was odd.

**Buttoning and unbuttoning activity :** To develop fine motor skills and to encourage children to do things independently buttoning and unbuttoning activity was conducted.

**Number lotto game :** To revise and reinforce the concepts taught. Here teacher gives a card to children with number or number of objects written and the child is asked to hop on the related the number or number of objects drawn in the box.

**Outdoor games :** Children love to explore their natural surrounding and eventually learn by manipulation of real objects around them. Play time is one such activity which enables students to learn as they handle things in nature. Other than this playing and jumping around also leads to gross motor development of the children.

**Initial sound game :** Helps the children to increase confidence and encourages to express themselves. It also develops skills to listen attentively. Teacher calls out a word eg. Ladder, tiger etc. children have to identify the first letter of the word and write on their slates or jump on letter written on floor.

### **Games and puzzles :**

Toys and puzzles helps to develop the creative and imaginative skills of children. Children love to play and enjoy games and puzzles every week.
