

## ENSURING SAFETY

D.A.V. Public school, Thane follows the principle of 'Safety First' and so it ensures the safety and security of each and every student, teacher and the property. To achieve this, the school organized a Mock fire Drill to create awareness among the staff and students about the various safety measures to be followed during fire accident.

The drill included all the steps to be taken immediately from sighting the fire to the last step ensuring the safety and security of people and property. The drill not only helped in creating an awareness among the students and the staff, but also would enable them to face any situation of fire accidents at any time or place. It is one of the steps taken to make it a point that their services go beyond the school premises.
