

COMPUTER / ICT LAB

THE LEARNING HUB

The school has a well equipped Computer Lab and each student works individually on one PC during class.

Computers have revolutionized the way we live and work and we believe the education too has grown beyond learning from textbooks. The internet is a treasure trove of information and we allow students and teachers to access the internet, which is arguably the most extensive library in the world. With the internet, the students' curiosity can be kindled to explore the unknown.
