

SCHOOL LIBRARY – STOREHOUSE OF INFORMATION FOR EXPLORATION

- **The school has a wonderful library. The library is a very important part of a school as it helps students to gain and acquire knowledge. It is the heart and soul of a school as it provides lots of information and details that students would require. From small story books to large reference books, journals and magazines are all available in our library. They are all arranged in different sections, so that it becomes easy for those who search for a particular book. It helps students refer notes that they are looking for and helps in cultivating a reading habit too. The library is usually a very quiet place and it is often seen full with students and teachers referring notes that they require for the respective subjects that they are looking out for.**
