VACCINATION DRIVE AT D.A.V PUBLIC SCHOOL, THANE

Alone we can do so little; together we can do so much.

— Helen Keller

D.A.V Public School, Thane, firmly believes in serving the society in every possible way whenever the situation demands. The school has successfully carried out vaccination drive for teenagers of 15 to 18 years of age on 12th and 13th of January. Systematic arrangements were made to ensure that the drive is carried out effectively. The school team responsible for this vaccination drive ensured that there are specific zones dedicated for registration, pre- vaccination and post vaccination. The students have been asked to report with one accompanying parent. The institute ensured that hot water and some refreshments are provided immediately after vaccination. The team's special task force also ensured spontaneous and periodic sanitization and hygiene of the premises. A team of doctors and nurses worked efficiently with school task force to ensure smooth execution of the drive. Ms. Simmi Juneja, Principal of the institute, provided every possible help right from planning to implementation and guided the designated team.

Parents thanked the school for this initiative of giving back to the society which was well planned and smoothly coordinated with precise team efforts. The school had successfully carried out vaccination drive earlier for adults on 17th June and 9th September 2021. This was also well received and appreciated by the parents community.
