Principal's Message

Date: 16 April 2021

Dear Parents

Greetings!

The ongoing pandemic situation is threatening to rock our boat once again. In these difficult times, I would like to reach out to you and share my innermost feelings.

COVID-19 with its sudden upheaval has changed our routines and lifestyles. Each one of us is affected by the corona virus pandemic. It has accelerated existential issues like acute individual loneliness in the wake of lockdowns and quarantines, causing disturbance in the economic world, dotting the interpersonal space with mistrust of each other; in short affecting our entire way of life adversely.

This is a collective crisis of an unprecedented magnitude and saving lives and reviving livelihoods are the current priorities of society today. There are innumerable inspiring stories of selfless corona warriors, who are not ready to give up and surrender to this pandemic situation.

As the world stays secured behind doors during the current lockdown situation, we too must stay indoors and indulge in constructive activities that give us peace and solace.

In an effort to battle this challenge we need to step up our awareness about the pandemic crisis. We must ensure all around *cleanliness* in our homes and in the environment around us. We must insist on *wearing a mask* when we move around in public places and follow *social distancing norms* when we are in a place with people around. And last but not the least, we must ensure that we *wash our hands* diligently.

As the motto goes that if this menace has to be fought on all front, we have to be laced with medicine, vaccine and following the rules strictly.

Even the slightest chink in the adherence to these norms would spell disastrous consequences for mankind. We must rise to meet this formidable challenge bravely.

As it is often said, "There is always light at the end of the tunnel", the light shall guide us out of this present crisis.

Looking forward eagerly to a pandemic free world.
